**If YES: The only financing available is for your initial investment to obtain the franchise territory/territories that you wish to own.**  
 Your investment for the franchise territory/territories ownership can be financed by an associated company from one to four years, if you qualify and have assets to pledge to cover this amount of your franchise ownership investment. This monthly payment does not start until the fourth month of your operation. Then based upon your earnings, your payment may be deducted from your monthly franchise income.

There are fixed expenses/fees required when each franchise is established that must be paid at your initial training class when your business is being established; these expenses/fees cannot be financed (approx. 20% of your total investment).

**What amount of initial investment are you wanting to make?**
